Lookbook

WHY CLARUS?

Whiteboards are porous, which means that over time, ink soaks into the surface, leaving you with a stained, discoloured board that typically needs to be replaced every 3-4 years.

With glass, your writing surface will never stain or ghost because it is 100% non-porous.

But why should you buy Clarus Glassboards? Well, we're glad you asked.

- **More Than Just Glass on a Wall.** We like to think of ourselves as pioneers in design-led communication solutions, for the offices of today and tomorrow.
- **Total Cost of Ownership.** With our lifetime guarantee, you only need to buy a Clarus glassboard once.
- **Unlimited Customisation.** Name the shape, size and colour; we'll make it.
- **Global Reach.** With manufacturing in Europe and America, Clarus offers worldwide coverage of service, quality and lead time.
- **Clarus is Green.** We conform to the highest standards of environmental sustainability requirements, including BREEAM and LEED.

LOVERS OF CLARUS WORLDWIDE

VIEW

View is an evolutionary step in glassboards; as the first ever high-definition glass writing surface that can be projected on. With its clean lines, clarity of picture, and beautiful space-saving design; View serves as the ultimate multi-functional projection surface.

PRODUCT FEATURES

- High-definition projectable glass writing surface
- 16:9 aspect ratio — international standard for high-definition media
- Compatible with any marker, even permanent
- Laboratory tested gain of 0.9

OPTIONS

SIZE (W x H)

- 80" (1778 x 1016mm)
- 100" (2210 x 1270mm)
- 120" (2642 x 1524mm)

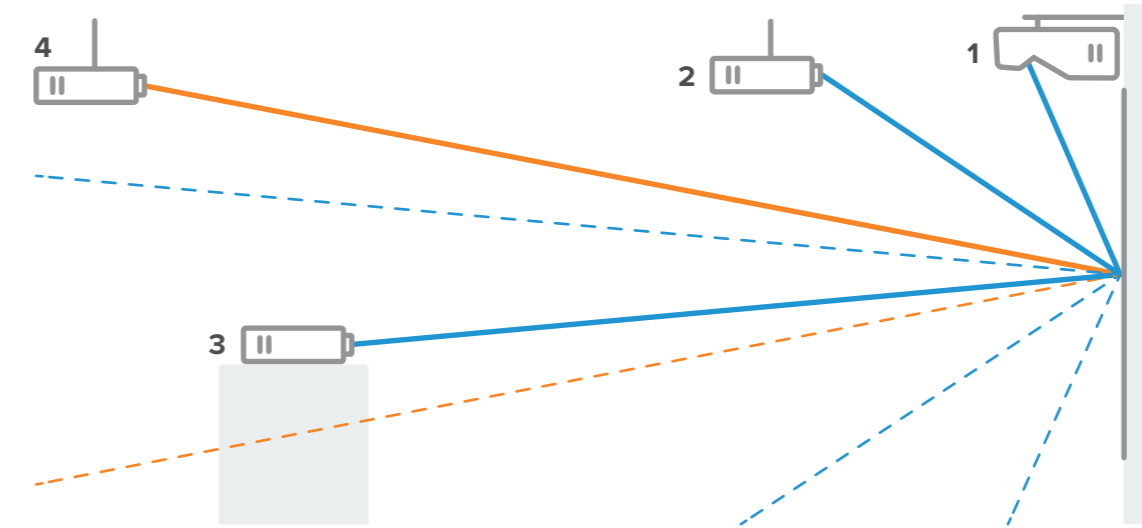

FRAME

- Customise your View with clear anodised or black aluminum frame

SURROUND 3.0

- Surround 3.0 is an ultra-thin frame profile that sits flush to the glass
- With View flanked by Surround 3.0 glassboards, designers can build continuous writable surfaces from wall to wall

■ Clarus Recommended
 ■ Requires Extra Planning
 — Light Path
 - - - - Glare Path

	PROJECTOR TYPE & POSITION	THINGS TO NOTE
1	Ceiling-Mounted, Ultra-Short Throw	<ul style="list-style-type: none"> • Best option - lens glare is deflected to the floor
2	Ceiling-Mounted, Short Throw	<ul style="list-style-type: none"> • Great option - lens glare is deflected to the floor • The height of the ceiling and the viewers' proximity to the View board will impact the success of the application
3	Traditional, Table-Mounted, Long Throw	<ul style="list-style-type: none"> • Good option, but placement of projector matters • The closer the projector is placed to the board, the better
4	Traditional, Ceiling-Mounted, Long Throw	<ul style="list-style-type: none"> • Lens glare will likely be viewable by seated audience • A high ceiling can result in a successful application

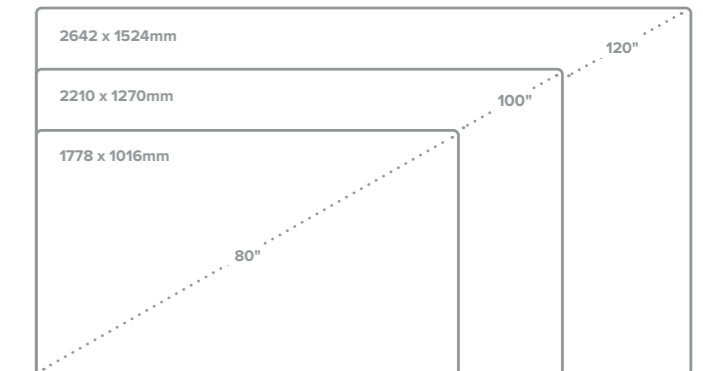

Please remember to always consult your AV professional

SELECTING A PROJECTOR TYPE & POSITION

Pairing your View with the correct projector is critical for optimal performance.

For optimal projection, Clarus recommends using an "Ultra-Short Throw" projector with your View glassboard.

SIZING OPTIONS

ADAPT

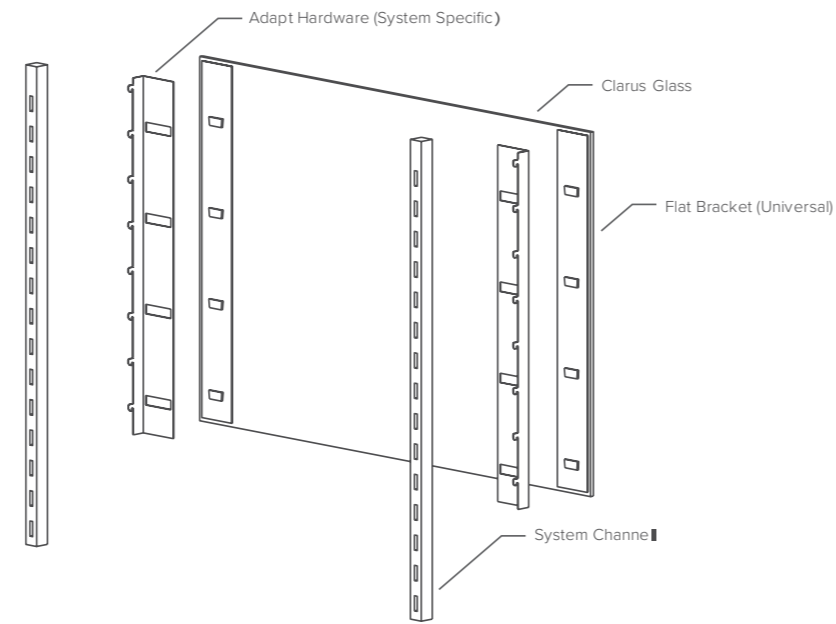

Adapt is a customisable glass panel system that is compatible with many leading office furniture manufacturers. Our design team has taken the time to engineer minimal and turnkey mounting systems for Adapt. Contact us to discuss a solution for your system.

PRODUCT FEATURES

- Available in more than 150 standard glass colours
- Compatible with most furniture systems
- Best in-class lead times
- ColourDrop custom graphic printing options available
- Available in both magnetic & non-magnetic finish

EASY TO INSTALL

With precision-designed mounting hardware for over 40 office furniture systems, installation is easy.

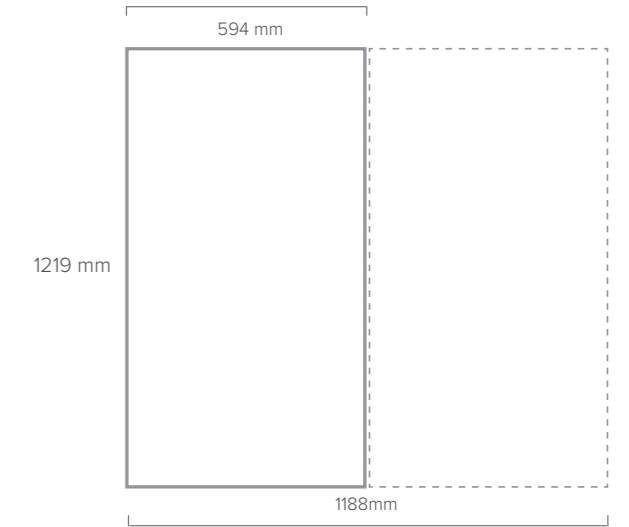

FLIP

Re-think the way you use writable surfaces in work spaces. Flip lets you use both sides of a Clarus board, with acoustic felt on one side for sound absorption and heightened aesthetics, and a beautiful, glass writing surface on the other side.

PRODUCT FEATURES

COLOURS BY CLARUS

Colour is a personal expression of style that sets the tone of a space. Colours by Clarus offers a stunning array of 150+ custom paint colours, each colour carefully selected by the Clarus Design Studio to make your glassboards uniquely beautiful.

Apply CBC to any glassboard project and transform your space.

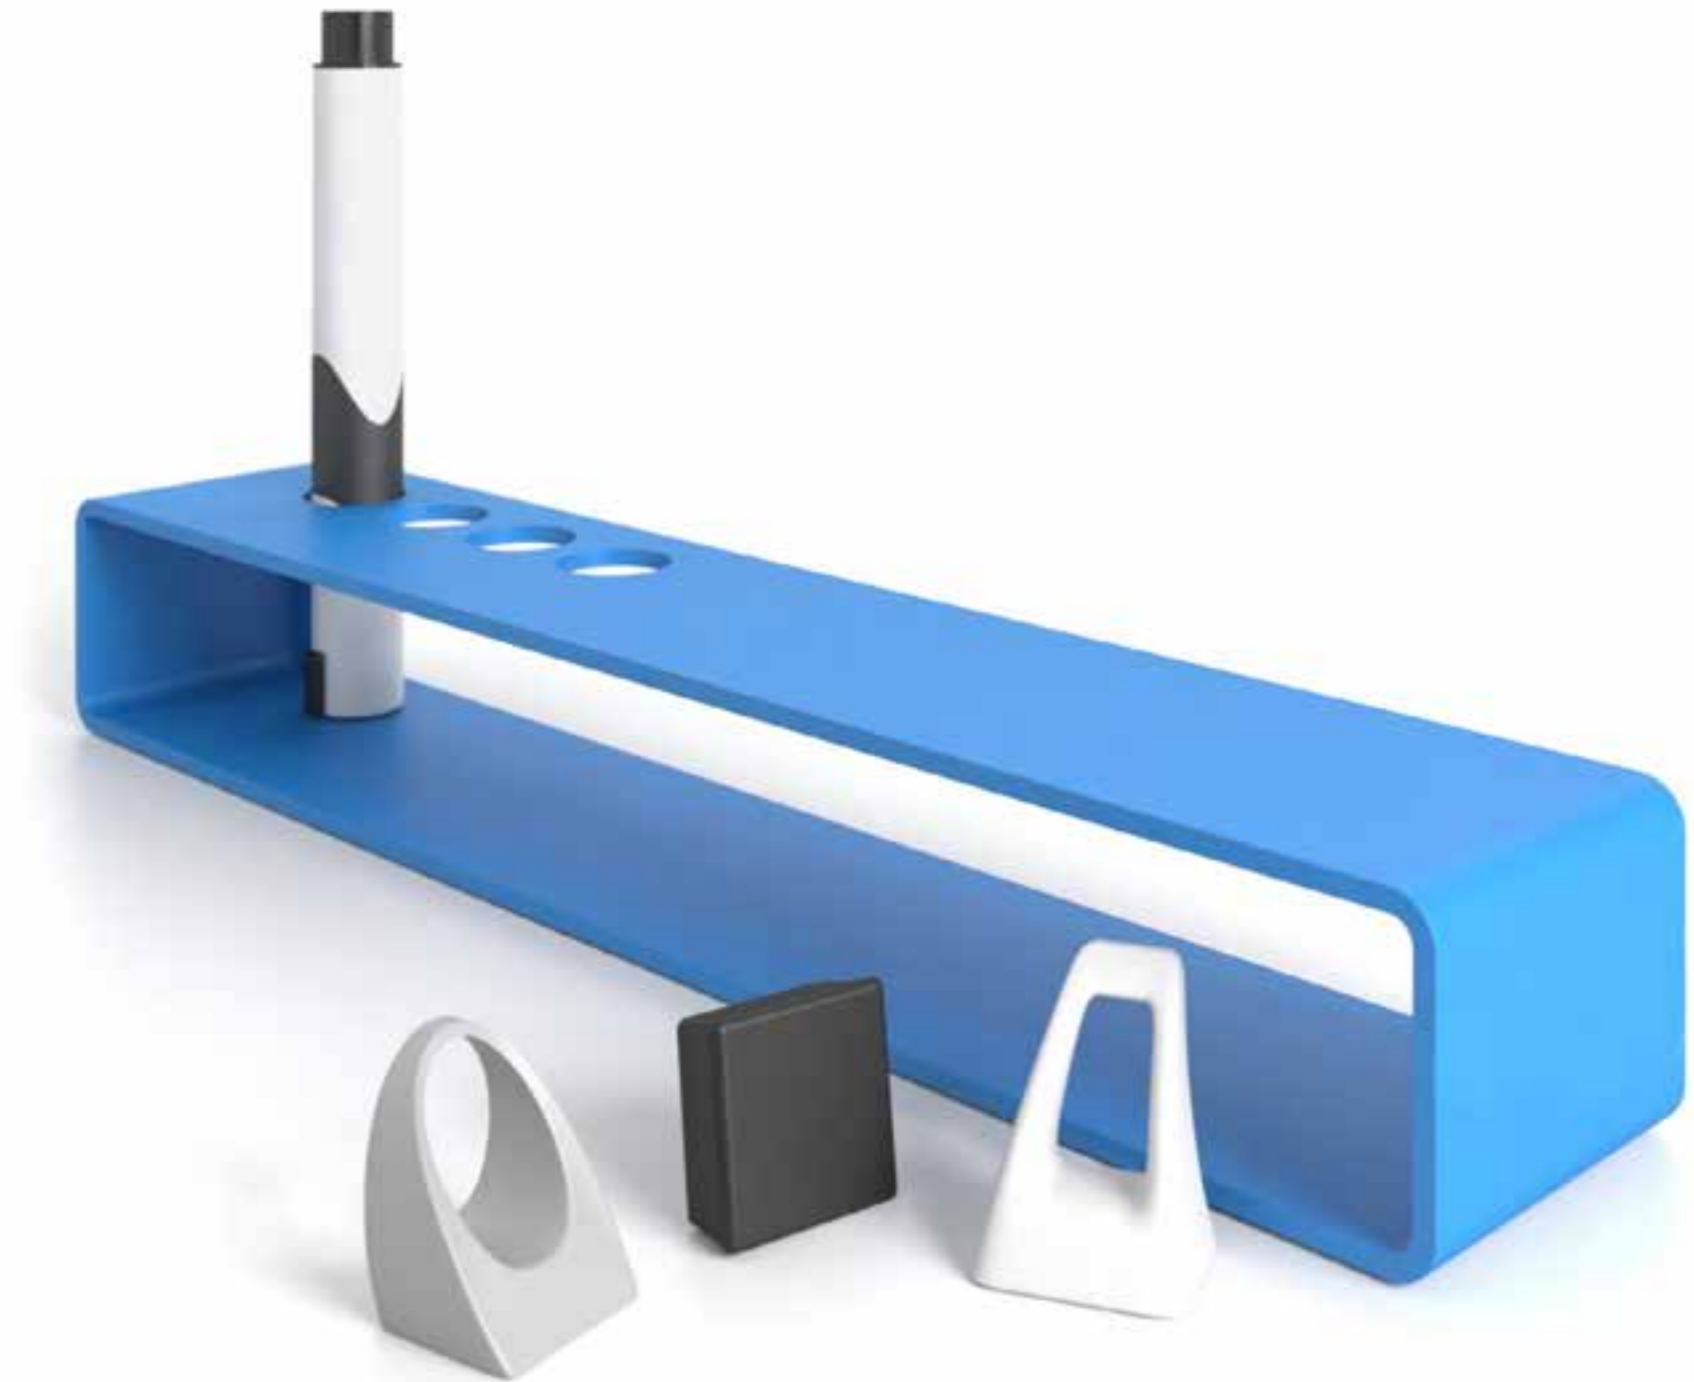

COLOURDROP GRAPHICS

ColourDrop is Clarus' proprietary, direct-to-glass, printing technology. ColourDrop allows you to print colourful images, graphics, logos, watermarks and charts directly onto any glassboard, and it's guaranteed to never fade or discolour. It is the most advanced printing technology in the industry. Bring your best ideas to life on Clarus glassboards.
